Agile Pro Handsets

Specifications

Control how you sit and stand with your Agile Pro desk. Customise your handset with the ability to save up to three memory positions, or choose to upgrade the look of your handset with touch glass displays.

Digital Handset (Standard)

- Customisable handset
- European design
- Modern look and feel
- Up to three memory positions
- Three digit LED display
- Responsive up / down function
- Under-desk mounting
- Slightly bevelled surface makes it easy to operate

Touch Digital Handset with USB (Upgrade)

- Customisable handset
- European design
- Sleek glass touch screen
- Up to three memory positions
- Three digit LED display
- Responsive up / down function
- USB port - for charging smart phones, tablets and other mobile devices
- Under-desk mounting

In-Desk Digital Handset (Upgrade)

- Customisable handset
- European design
- Sleek glass touch screen
- Up to three memory positions
- Three digit LED display
- Responsive up / down function
- In-desk mounting (requires custom worktop)
- Key-lock

Agile Pro Control Box

The inner workings.

FEATURES

- 240 W output power
- Cost-effective SMPS (switched-mode power supply)
- Ultra-efficient 0.1 W standby power consumption (reducing CO2 emissions to a minimum)
- Improved driving dynamics: increased responsiveness & smooth start/stop
- System protection ensured with integrated collision detection
- Storage and shelf stops
- Sit/stand memory for Basic Hand Controls
- Compatibility for standalone/mobile desk solutions
- Slim, low-profile design (height 40 mm)

Smart Office

Bluetooth Smart Box and Smart Office App

Connect to your office desk and personalise through the Smart Office App by setting min/max heights, reminders for standing/sitting, position favourites and more.

FEATURES

- Connect with individual or multiple desks
- Operate up and down of desk
- Reminders to sit and stand
- Set target for sitting and standing times
- Daily and weekly reports for total sit/stand times and calories burned
- Programme your frequently used positions with three memory settings

Agile Pro enables single and shared users to experience a combination of quality, function and modern design in a sit-to-stand desk.

Agile Pro Screens

Compatible Screen Options

As an integral part of the design process, Agile Pro supports policies and practices that puts your business at the heart of what we do. Our designs and products are carefully manufactured from trusted partners, with certifications including:

WARRANTY

Knight Group guarantees you for up to 15 years against faulty parts and workmanship based on a normal 40 hour week. Visit www.knightgroup.co.nz for full warranty terms & conditions.

E1 BOARD

LFE stands for Low Formaldehyde Emission and is known as "E1", an internationally recognised standard of safety for composite wood board. This certification characterises an engineered wood product that is unobjectionable for almost all intents and purposes and may be used for interior finishing and furniture.

ISO 14001

ISO 14001 Certification is the international standard that specifies requirements for an effective Environmental Management System (EMS). It helps organizations improve their environmental performance through more efficient use of resources and reduction of waste. Agile Pro is manufactured in factories accredited to ISO14001.

GOOD WOOD

The manufacturer's environmental policy confirms that composite wood materials are sourced from well-managed, sustainable forests and that they hold internationally recognised forestry stewardship certification.

LAMINEX® NEW ZEALAND

Creates naturally beautiful, durable and unique surface finishes for commercial furniture.

AFRDI

AFRDI Certification is a set of standards covering strength, durability, stability and safety (and ergonomics in the case of desks and workstations). This means that Knight are accountable for maintaining the quality of our products, submitting them for regular auditing to ensure they meet the highest standards for commercial use.

BIFMA

BIFMA Certification focuses on safety and performance standards developed by the BIFMA Engineering Committee. The standards provide manufacturers, specifiers, and users with a common basis for evaluating safety, durability, and the structural adequacy of the specified furniture, independent of construction materials. The standards define specific tests, laboratory equipment to be used, the conditions of test, and the minimum acceptance levels to be used in evaluating these products.

GREEN TAG

Global Green Tag certified products pass the world's toughest standards to protect you, and your family's health and safety, minimise your impact on our finite planet and put the power of selection back in your hands. Agile Pro Green Tag certification in progress, and coming soon.
