

OFFICE SCREEN SOLUTIONS

Range for New Zealand

Studio50 is easy to lift, easy to install and quick to produce and deliver. Entirely designed and created by the Knight Group product development team. These light-weight and easy to manoeuvre partitions employ an innovative extruded-aluminium frame that effortlessly slides together and automatically locks into position.

Extruded aluminium frame finished in Black, White or Silver powdercoat.

Studio50 Freestanding

- 870h x 1200w x 50d mm
- 870h x 1500w x 50d mm
- 870h x 1800w x 50d mm
- Compatible with Agile or Agile Pro

Precision engineered auto-lock system

The Studio50 frame, designed in NZ by the Knight product development team, features an ingenious system that enables partitions to effortlessly slide together and automatically lock into position. By shedding many of the cumbersome components of conventional screen systems Studio50 shaves valuable minutes off each screen installation.

Quality components

Every component has been meticulously designed in New Zealand specifically for Studio50 office partitions - making them highly effective and easy to use. These cast aluminium Studio50 parts are built to last!

Light weight, industrial strength panels

The innovative combination of an aluminium frame and extruded polymer-resin foam core means Studio50 is not only extremely rigid but is also conveniently light-weight! Studio50 panels are a one person lift - making them a dream to install and re-configure.

Easily connect multiple frame heights

Because the Studio50 frame links and locks along the entire edge of the screen, you can connect any height together - without the need for any unsightly connectors!

100% Recyclable frame and core

The Studio50 aluminium frame and extruded polymer-resin foam core are 100% recyclable and reusable. Aluminium can be recycled indefinitely and is also the most cost-effective material to recycle.

Pinnable surfaces

Studio50's extruded polymer-resin foam core is an ideal pinnable surface - work areas can be easily organised and personalised.

Your choice of fabric

The pinnable face of a Studio50 screen can be finished in the fabric of your choice - making it easy to add colour to your office space. The Knight Group upholstery team recommends using either plain fabrics or large random patterns.

Multiple colour options

Incorporating partitions into the overall interior design of your office is easy! Each Studio50 panel can be covered in a different fabric, and by adding a transom to your screen you are able to have two colours.

Tidy, easy-access cable tray

The hinged Studio50 cable tray is designed for quick and easy access to your power and data. Gently lever the door open - once your cables are in position simply click the door back into place.

Cable-ducts wherever you need

The generous Studio50 cable management cavity* is designed to accommodate Category 6 wiring and can be specified at any height above or below the desks at the time of manufacturing.

*Excludes CMS and data outlets.

Adjustable foot

Studio50 stands on an adjustable levelling glide with 35mm travel allowing plenty of room to work on uneven floors.

Sturdy work-surface bracket

The cast aluminium Studio50 desk bracket locks securely to the frame and can be placed at the height best suited to the user. Practically hidden from sight, the bracket is a tidy solution to a screen-hung work-surface.
